

NICU Nesting Blankets

The NICU staff would love to have nesting blankets for each of their precious tiny babies and this is probably the easiest blanket you will ever make! Nesting blankets surround the baby and keep them in a certain position. (NICU has the capacity to have 48 babies so they need a lot).

The staff loves to make the surroundings for these babies comforting and wants everything coordinated as much as possible.

So, they would like to have PLAIN flannel blankets in SOLID colors to coordinate with other quilts that may be on the crib mattresses.

Directions:

Take a 1 yard square of solid-colored plain flannel fabric (washed of course) and just do a folded seam around all the edges. There you are done! Wasn't that easy?
